### **Land Acknowledgment**

The South Saskatchewan Region overlaps with Treaty 7, Treaty 4 and Treaty 6, and is home to many First Nations and Métis peoples who have a deep and intimate relationship and personal history with the land.

## The Engagement Guide's Purpose

The Government of Alberta is evaluating the relevancy and effectiveness of the current South Saskatchewan Regional Plan. The engagement guide:

- describes the purpose of the review;
- describes the engagement process for the 10-year Review of the <u>South Saskatchewan</u> <u>Regional Plan</u> and ways to participate;
- provides background information, including useful links to websites and resources; and
- provides a preview of the engagement survey questions so you can spend more time reflecting on your responses before starting the online survey.

# **Purpose of the Engagement**

The South Saskatchewan Regional Plan has become a key component of the province's land and natural resources planning system and regulatory system for the South Saskatchewan region.

Periodic reviews of Alberta's land use plans are important and necessary to ensure land use decision-making processes are responsive to changing economic, environmental and social factors over time and improved to support achieving the long-term vision and social, economic and environmental outcomes for the region.

The 10-year review is a process under the <u>Alberta Land Stewardship Act</u>, also known as ALSA, requiring the Land Use Secretariat (the secretariat) to review the ongoing relevancy and effectiveness of the existing South Saskatchewan Regional Plan. This review does not amend, repeal or replace the regional plan.

Your feedback will help us evaluate the relevancy of the South Saskatchewan Regional Plan and the plan's effectiveness so that it may continue to play its vital role in achieving the vision and outcomes for the South Saskatchewan Region.

1

### The Review Process

The review is of the current version of the South Saskatchewan Regional Plan, as amended in 2018, for ongoing relevancy and effectiveness. For the purposes of this review, relevancy and effectiveness are defined as follows,

### Relevancy is...

the extent to which the components of the regional plan have significant bearing on achieving the 50-year vision.

### Effectiveness is...

the extent to which the regional plan has achieved or is expected to achieve the outcomes and objectives.

As part of this review process, feedback from Albertans, Indigenous communities and organizations, municipalities and stakeholders will help the Government of Alberta understand the current perspectives on the ongoing relevancy and effectiveness of the existing plan in supporting the long-term vision for economic, social and environmental outcomes in the region. These perspectives help government identify barriers and challenges (and opportunities) to implementing the South Saskatchewan Regional Plan's strategic directions and achieving the plan's outcomes.

### Engagement includes:

- An online survey, and
- Staff from the Land Use Secretariat and government ministries are holding in-person sessions with representatives of Indigenous communities and organizations, municipalities, and stakeholders from different sectors in the South Saskatchewan Region.

This review does not amend, repeal or replace the regional plan. The feedback collected through this engagement will be summarized in a report to the Stewardship Minister on the ongoing relevancy and effectiveness of the regional plan. The report may include potential recommendations for improvements to the regional plan. In response to the review report, government may initiate a process to amend the South Saskatchewan Regional Plan, which will follow the process and consultation requirements under the ALSA.

While a 10-year review may lead to an amendment process for a regional plan, amendments may be made at any time, irrespective of a review or its timing.

### What's in scope for the review

The review is of the current version of the South Saskatchewan Regional Plan as amended in 2018. The review may be informed by developments related to the region and current context, but only the South Saskatchewan Regional Plan and anything made as part of the plan is being reviewed.

The Government of Alberta will consider the following information as part of its review:

- lessons learned in implementing the existing regional plans (Lower Athabasca Regional Plan and the South Saskatchewan Regional Plan),
- the 5-year Evaluation Reports,
- Progress Reports and Indicators,
- feedback provided over the past 10 years,
- the South Saskatchewan Region's Profile when the plan was developed and approved,
- the region's future trends and outlook, and
- feedback from Albertans.

The government may receive recommendations for improvements that may be related to implementation, such as reporting, that do not require changes to the plan itself. These will be provided in the report to the Stewardship Minister for information.

### Who should participate in the online survey?

All Albertans are invited to participate in the online survey.

Do you live, work or recreate in the South Saskatchewan Region? Do you have an interest in the land-use and natural resource management in the region? By participating in this engagement, your perspectives will inform the report to the Stewardship Minister on the ongoing relevancy and effectiveness of the South Saskatchewan Regional Plan.

### Where you can find more information to support preparing your responses

- South Saskatchewan Regional Plan
- Map (for other maps, please see Maps and Shapefiles)
- Progress Reports for 2015 2023
- SSRP 5-year Evaluation Report (2014-2019)
- Website for Regional Plan Indicators
- Website for reports on the status of air quality and water quality
- Website for agriculture reports for the SSRP
- Land Use Framework
- Alberta Land Stewardship Act

### How can someone provide their feedback?

The online survey for the South Saskatchewan Regional Plan 10-year review provides an opportunity for the public to share their perspectives on the ongoing relevancy and effectiveness of the regional plan. The online survey will be available in September 2024 on the Government of Alberta Public Engagement site.

Inquiries related to the South Saskatchewan Regional Plan 10-year review can be forwarded to the secretariat at:

Land Use Secretariat, email SSRP10-YearReview@gov.ab.ca

Phone: 780-644-7972

12th floor, South Petroleum Plaza 9915 – 108 Street Edmonton, AB T5K 2G8.

# **Regional Planning in Alberta**

### **Alberta's Land-use Framework**

The <u>Land-use Framework</u> sets the province's approach for managing lands and natural resources to support growth and sustain Alberta's growing economy, while integrating and achieving Albertans' economic, environmental and social goals. The framework is designed to ensure good stewardship of Alberta's lands and natural resources so that future generations of Albertans benefit from the province's natural beauty and prosperity, just as we do today.

The Land-use Framework established three desired outcomes:

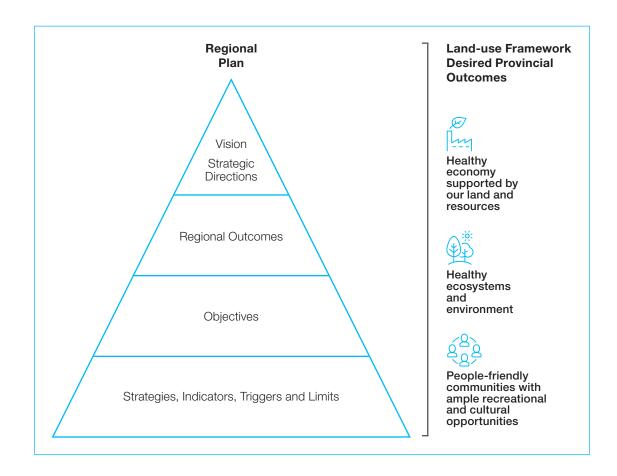

- Healthy economy supported by our land and natural resources;
- Healthy ecosystems and environment; and
- People-friendly communities with ample recreational and cultural opportunities.

A more detailed history of the Land-use Framework and description of the purpose of regional plans can be found on the Land-use Framework website.

### What is a Regional Plan

One of the key strategies identified in the Land-use Framework for improving land-use decision-making is the development of seven regional plans based on seven land-use regions. Regions are not uniform. Their boundaries are generally based on the province's main watersheds, with each region unique in terms of its natural resources and patterns of human development.

Developed through consultation with the public, stakeholders, and Indigenous communities and organizations, a regional plan provides a vision of how a region should look over several decades and considers a planning horizon of at least 50 years.

A regional plan has four key components:

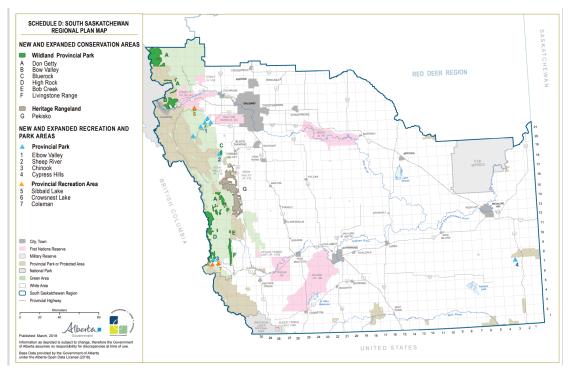

- Introduction includes the purpose of the regional plan, land-use planning and decision-making in Alberta, and how the regional plan will inform land-use decisions.
- Strategic Plan includes the vision for the future of the region along with desired regional outcomes. It builds on existing policies and initiatives by establishing a set of strategic directions that help achieve the regional vision and outcomes.
- Implementation Plan includes regional objectives, strategies and actions that will be undertaken to support achievement of the regional vision and outcomes and indicators to measure and evaluate progress.
- Regulatory Details Plan enables achieving the strategic direction and strategies and actions, and may include enforceable requirements.

After a regional plan is approved by Cabinet, it applies to subsequent planning and decision-making in Alberta carried out under various policies and pieces of provincial legislation.

### The South Saskatchewan Regional Plan

Development of the South Saskatchewan Regional Plan, also sometimes called the SSRP, commenced in 2009. The plan was created by seeking advice on the current and future land-use activities and challenges in the region identified by the public, stakeholders and Indigenous communities and organizations through three rounds of engagement and consultation.

<sup>&</sup>lt;sup>1</sup> The map in the SSRP (2018) no longer includes references to areas that have been designated under the *Provincial Parks Act*, including:

Castle "new and expanded conservation area" is now the designated Castle Provincial Park.

<sup>•</sup> Syncline "new and expanded recreation and park area" is now designated as part of Castle Provincial Park.

The South Saskatchewan Regional Plan came into effect September 1, 2014 and with its subsequent amendments:

- creates 16 new and expanded parks, conservation areas and recreation areas;
- establishes thresholds used in regulatory decision-making:
  - Air Quality Management Framework
  - Surface Water Quality Management Framework
- establishes guidelines and processes to avoid conversion and maintain intact native grasslands on public lands;
- adopts and replaces the Eastern Slopes Policy in the region;
- incorporates updated broad land-use policy statements to provide guidelines to municipalities on expectations needed to promote cooperation and coordination in land-use planning, and replaces the Provincial Land Use Policies for municipalities under the *Municipal Government Act*;
- establishes the motorized access limits for the Livingston Public Land Use Zone and the Porcupine Hills Land Use Zone;
- endorses a number of existing Integrated Resource Plans that remain in effect until they have been reviewed for their relevancy and incorporated as appropriate under the implementation strategies in the plan or future sub-regional or issue-specific plans within the region; and
- establishes the expectation that municipalities minimize fragmentation and conversion of agricultural lands.

The South Saskatchewan Regional Plan was amended in 2017 to enhance protection of the Castle Area through the expansion of the Castle Wildland Provincial Park and the creation of a new Castle Provincial Park. It was amended in 2018 to enable the implementation of the Porcupine Hills-Livingstone Land Footprint Management Plan and Recreation Management Plans and the regulation of motorized access in the new Livingstone and Porcupine Hills Public Lands Zones.

### **Vision for the South Saskatchewan Region**

Southern Alberta is a diverse, healthy, vibrant and prosperous region where the natural beauty of the region is managed so that citizens feel connected to the land and its history. Albertans, industry, governments and aboriginal peoples<sup>2</sup> work together to share responsibility for stewardship of the land and resources in a way that ensures current needs are met without compromising opportunities for future generations. Aboriginal peoples, through their traditional knowledge, share their intimate understanding of the region's natural environment and ecosystems.

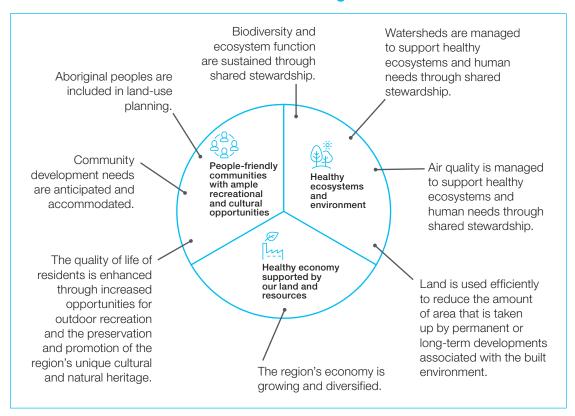

The South Saskatchewan Region supports a diverse and growing population. Economic diversification supports employment and contributes to a prosperous future. Agriculture is a significant renewable resource industry demonstrating environmental stewardship while pursuing growth and diversification opportunities. There are continued opportunities for oil and natural gas production and renewable energy will become increasingly significant. Forests are managed with watershed management and headwaters protection as the highest priority and healthy forests continue to contribute to the province's timber supply. The region has unique landscapes that form the basis of a popular tourism and recreation destination which continues to grow.

Air, water, land and biodiversity are sustained with healthy functioning ecosystems. The headwaters in the region supply vital regional fresh water quality. Conservation strategies help many species at risk in the South Saskatchewan Region recover, while also preserving the diversity and splendor of Alberta's natural regions with various parks and conservation areas providing Albertans with improved health and inspiration to value nature.

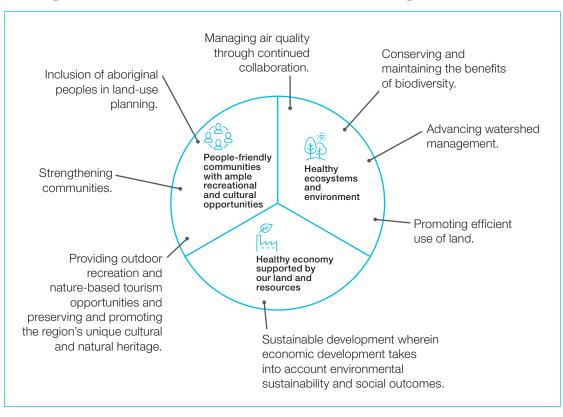

7

<sup>&</sup>lt;sup>2</sup> For the purpose of this Guide and the survey, the term "aboriginal" is used when referring directly to the SSRP 2018 or to section 35 of the *Constitution Act*, 1982. In more recent years, the term "Indigenous" has been more frequently used.

### **Outcomes for the South Saskatchewan Region**

### Strategic Directions for the South Saskatchewan Region

# We want to hear from you – Scope of the engagement survey questions

This survey contains questions that are broad to allow you to identify what is important in considering the ongoing relevancy and effectiveness of the South Saskatchewan Regional Plan. When answering survey questions, it may be helpful in considering your responses to ask yourself questions, such as:

- Do the objectives continue to align with the outcome?
- How confident are you that if we achieved the objectives, we would achieve the outcome?
- How frequently do you consider the objective or strategic direction in your activities, planning or decisions?
- Do the strategies continue to align with the objective, strategic direction and outcome?
- What factors influence the continued relevancy and effectiveness of the strategic directions, objectives, strategies, indicators or thresholds?
- Are these strategies clear enough to guide your activities, planning and decisions?
- Is there a component, or components of the strategy that should continue to be a focus in the region?
- Do the indicators effectively measure for the outcome or objective?
- Which indicators are less effective measures, and why are they less effective?
- What factors influence the continued relevancy and effectiveness of the triggers and limits?

# **Engagement Survey**

### South Saskatchewan Regional Plan 10-year Review

The survey commences with an introduction to the *Alberta Land Stewardship Act*, the South Saskatchewan Regional Plan and the purpose of the 10-year Review.

The survey will take 20 to 30 minutes to complete and closes on December 6, 2024.

### **FOIP Collection Notice**

### Your privacy is important

The views or opinions you provide, as well as the personal information about you, are protected by the *Freedom of Information and Protection of Privacy* (FOIP) *Act*. We are collecting this information to inform the Stewardship Minister about the relevance and effectiveness of the South Saskatchewan Regional Plan, as authorized by Section 33(c) of the *FOIP Act*. We will not use or disclose your personal information for any other purpose without your written consent or unless required to do so by law.

If you have questions about how we collect or use your information, contact the Office of the Land Use Secretariat by calling 780-644-7972, emailing <u>LUF@gov.ab.ca</u> or mailing: 12th floor, South Petroleum Plaza 9915–108 Street Edmonton, AB T5K 2G8.

Please do not submit responses that include personal information about other people.

# **Survey Table of Contents**

Section 1	Vision and Strategic Directions11
<ul> <li>Question</li> </ul>	s about the relevancy and effectiveness of the Vision and Strategic Directions.
Section 2	Economy13
	s about the relevancy and effectiveness of the Economic Objectives and Strategies in the Outcome for the Economy.
Section 3	Air <u>16</u>
	s about the effectiveness of the Objective, Strategies, Indicators, Triggers and Limits ng the Outcome and Objectives for Air.
Section 4	Biodiversity and Ecosystems17
	s about the relevancy and effectiveness of the Objectives and Strategies in achieving ome for Biodiversity and Ecosystem Function.
Section 5	Water19
	s about the effectiveness of the Objectives, Strategies, Indicators, Triggers and Limits ng the Outcome for Water.
Section 6	Efficient Use of Land22
	s about the effectiveness of the Objective and Strategies in achieving the Outcome on Use of Land.
Section 7	Outdoor Recreation and Historic Resources23
	s about the effectiveness of the Objective and Strategies in achieving the Outcomess or Recreation and Historic Resources.
Section 8	Inclusion of Aboriginal Peoples in Land-use Planning24
	s about the effectiveness of the Objective and Strategies in achieving the SSRP for the Inclusion of Aboriginal Peoples in Land-use Planning.
Section 9	Community Development
	s about the effectiveness of the Objectives and Strategies in achieving munity Development Outcome.
Section 10	Regional Indicators of Interest <u>30</u>
	s about the effectiveness of the Indicators in Table 1.
<ul> <li>Question</li> </ul>	s about the effectiveness of the Indicators in the South Saskatchewan Regional Plan.
Section 11	Overall Feedback on the South Saskatchewan Regional Plan32
Section 12	Tell Us About Yourself 32

### **SECTION 1: Vision and Strategic Directions**

The SSRP contains the following 50-year vision:

Southern Alberta is a diverse, healthy, vibrant and prosperous region where the natural beauty of the region is managed so that its citizens feel connected to the land and its history. Albertans, industry, governments and aboriginal peoples work together to share the responsibility for stewardship of the land and the resources in a way that ensures current needs are met without compromising opportunities for future generations. Aboriginal peoples, through their traditional knowledge, share their intimate understanding of the region's natural environment and ecosystems.

The South Saskatchewan Region supports a diverse and growing population. Economic diversification supports employment and contributes to a prosperous future. Agriculture is a significant renewable resource industry demonstrating environmental stewardship while pursuing growth and diversification opportunities. There are continued opportunities for oil and natural gas production and renewable energy will become increasingly significant. Forests are managed with watershed management and headwaters protection as the highest priority and healthy forests continue to contribute to the province's timber supply. The region has unique landscapes that form the basis of a popular tourism and recreation destination which continues to grow.

Air, water, land and biodiversity are sustained with healthy functioning ecosystems. The headwaters in the region supply vital regional freshwater quality. Conservation strategies help many species at risk in the South Saskatchewan region recover, while also preserving the diversity and splendor of Alberta's natural regions with various parks and conservation areas providing Albertans with improved health and inspiration to value nature.

- 1. How relevant is the SSRP Vision today?
  - O Not at all relevant
  - O Not very relevant
  - O Somewhat relevant
  - O Very relevant

**NOTE:** Relevancy is the extent to which components of the regional plan have significant bearing on achieving the 50-year vision.

2. What factors did you consider when rating the SSRP Vision's relevance? (Essay)

### **SSRP Strategic Directions**

The SSRP establishes eight strategic directions:

- Sustainable development within economic development takes into account environmental sustainability and social outcomes.
- Managing air quality through continued collaboration.
- Conserving and maintaining the benefits of biodiversity.
- · Advancing watershed management.
- Promoting the efficient use of land.
- Providing recreation and nature-based tourism opportunities and preserving and promoting the region's unique cultural and natural heritage.
- Inclusion of aboriginal peoples in land-use planning.
- Strengthening communities.

11

	<ul><li>O Not at all relevant</li><li>O Not very relevant</li><li>O Somewhat relevant</li><li>O Very relevant</li></ul>
	<b>NOTE:</b> Relevancy is the extent to which components of the regional plan have significant bearing on achieving the 50-year vision.
4.	Do you have any suggestions to improve the relevancy of the SSRP Strategic Directions? (Essay)
5.	How effective are the Strategic Directions in achieving the SSRP Vision?  O Not at all effective O Not very effective O Somewhat effective O Very effective
	<b>NOTE:</b> Effectiveness is the extent to which the regional plan has achieved or is expected to achieve the outcomes and objectives.
6.	Do you have any suggestions to improve the effectiveness of the SSRP Strategic Directions? (Essay)
7.	Would you like to provide more detailed feedback on specific sections of the SSRP?  O Yes, all sections O Yes, some sections Which sections(s) would you like to provide feedback on? (checkbox) O Economy O Air O Biodiversity and Ecosystems O Water O Efficient Land Use O Outdoor Recreation and Historic Resources O Inclusion of Aboriginal Peoples in Land-use Planning O Community Development  O None of the above (skip to page 32)
	C Hone of the above (only to page of)

3. How relevant are the Strategic Directions to achieving the SSRP Vision?

<sup>\*</sup>All fields marked with an asterisk (\*) are required.

### **SECTION 2: Economy**

The South Saskatchewan Region has a long history of strong economic growth in the agricultural and energy sectors and supported by forestry, mining and tourism. The Strategic Direction for the economic outcome focuses on sustainable development, considering both environmental sustainability and social outcomes.

**Outcome: The region's economy is growing and diversified.** (SSRP pages 43 – 52)

Economic Objectives		
Agriculture	The region's agricultural industry is maintained and diversified.	
Energy	Opportunities for the responsible exploration, development and extraction of energy resources are maintained.	
Renewable Energy	Opportunities for the responsible development of the region's renewable energy industry are maintained in support of Alberta's commitment to greener energy production and economic development.	
	Value-added opportunities that enhance the sustainability of Alberta's industries and communities are created.	
Forestry	The region's forest industry is maintained and diversified.	
Surface Materials	Opportunities for the responsible development of surface material resources are maintained on public lands.	
Tourism	The region is positioned as a world-class, year-round, tourist destination.	

- 8. How effective are the Economic Objectives in achieving the SSRP Economy Outcome?
  - O Not at all effective
  - O Not very effective
  - O Somewhat effective
  - O Very effective

**NOTE:** Effectiveness is the extent to which the regional plan has achieved or is expected to achieve the outcomes and objectives.

9. How could the relevancy or effectiveness of the SSRP Economic Objectives be improved? (Essay)

### Strategies for Economic Outcome and Objectives

The SSRP outlines several strategies to support the Economic Outcome and Objectives (pages 44-51). Below is a summary of those strategies:

### **Summary of Economic Strategies**

Summary of Economic Strategies		
Agriculture	Maintain an agricultural land base by reducing the fragmentation and conversion of agricultural land.	
	Support a diverse and innovative irrigated agriculture and agri-food sector.	
	Assist the agriculture and agri-food industry to maximize opportunities for value-added agricultural products.	
	Support a business climate and complementary production and marketing approaches that recognize the contribution of local production in addition to existing domestic and international market opportunities	
	Support and enhance the next generation of agricultural, food and rural entrepreneurs.	
	Encourage use of voluntary market-based instruments for ecosystem services	
Energy	Ensure rules regarding access to energy and processing and transportation of energy resources are clear	
	Maintain physical access to freehold (privately owned) petroleum and natural gas, coals and minerals.	
Renewable Energy	Ensure policies are in place to promote and remove barriers to new investments in renewable energy (that is, wind, biofuels, solar, hydro) production.	
	Invest in the development, demonstration and deployment of renewable and alternative energy technologies targeted to improve Alberta's overall energy efficiency	
	Ensure reinforcement of the transmission system to enable more renewable power in the region.	
	Ensure that opportunities for future routes and siting for pipeline gateways, transportation corridors and utility and electrical transmission corridors are maintained in the region	
	Work with municipalities, landowners and industry to explore multi-use corridors for colocation of linear infrastructure that supports critical economic linkages to markets for expanded access.	
Forestry	Promote diversification of forestry industry through implementation of the Alberta Forest Products Roadmap to 2020	
	Deliver an effective forest health management program to mitigate risk to timber supply and forest health.	
	Incorporate wildfire management planning into forest management initiatives	
Surface Materials	Allocate the surface materials appropriately and monitor extraction operations to provide opportunities for sustainable development of the land.	
	Work with municipalities, industry and other stakeholders to identify areas of existing and future extraction of surface materials and mineral resources and determine appropriate land uses in the vicinity of these resources.	
Tourism	Enhance Tourism Destination Areas within the South Saskatchewan Region (Kananaskis, Canadian Badlands and Southwest Alberta) by engaging with aboriginal communities, municipalities, industry and local stakeholders	
	Work with municipalities, private investors and landowners to identify areas of high value for recreation and tourism and to encourage tourism investment and infrastructure development opportunities on identified lands.	
	Work with municipal governments and other partners to identify, establish and promote scenic byways in and around areas with high-quality attractions and recreation and tourism features	
	Provide long-term security (e.g., longer-term leases) for tourism and recreation investment opportunities.	
	Develop a regional tourism strategy that will identify strategic actions that the Government of Alberta can undertake in order to support the development of the Castle Region as a successful tourism destination.	

10.	How effective are the Strategies in achieving the SSRP Economic Objectives?
	O Not at all effective
	O Not very effective
	O Somewhat effective
	O Very effective

**NOTE:** Effectiveness is the extent to which the regional plan has achieved or is expected to achieve the outcomes and objectives.

- 11. How could the effectiveness of the SSRP Economic Strategies be improved? (Essay)
- 12. The Tourism Objective and Strategies position the region as a world-class, year-round tourism destination with enhanced Tourism Destination Areas.
  - O Strongly disagree
    O Somewhat disagree
  - O Somewhat agree
  - O Strongly agree
- 13. How could the effectiveness of the Tourism Objective and Strategies be improved? (Essay)

In the Coal Policy Committee's Final report: recommendations for the management of coal resources in Alberta-Open Government, it was recommended that land-use planning be used to determine where development of metallurgical coal, also known as coking coal, resources can occur. Metallurgical coal has a higher energy content compared to other types of coal and is used for higher-value industrial production. One of its most notable uses is in the production of steel.

14. Do you have feedback on the plan's effectiveness related to the responsible exploration, development and extraction of energy resources? (Essay)

### **SECTION 3: Air**

Air quality is managed in the region based on provincial policy, legislation and regulations including ambient air quality objectives. The emphasis has been on ensuring effective regulation of point source emissions. Reports about the Management Reponses to the Air Quality Management Framework can be found at alberta.ca/south-saskatchewan-regional-planning.

Outcome: Air quality is managed to support healthy ecosystems and human needs through shared stewardship. (SSRP pages 53 – 55)

Air Objective	
Air Quality	Releases from various point and non-point sources are managed so they do not collectively result in unacceptable air quality.

### 15. How could the effectiveness of the SSRP Air Objective be improved? (Essay)

The SSRP outlines several strategies to support the Air Outcome and Objectives (pages 53-54). Below is a summary of those strategies:

### Summary of Strategies for Air Quality

Implement the South Saskatchewan Region Air Quality Management Framework for Nitrogen Dioxide ( $NO_2$ ), Ozone ( $O_3$ ) and Fine Particulate Matter ( $PM_{2.5}$ ).

Continue to support the implementation of the <u>Calgary Region Airshed Zone Particulate Matter and Ozone Management Plan</u> in alignment with implementation of the <u>national Air Quality Management System</u> and the South Saskatchewan Region Air Quality Management Framework.

Encourage municipalities, industry and the public to be proactive in addressing air quality issues through voluntary programs and initiatives to address emissions sources such as transportation.

- 16. How effective are the Strategies in achieving the SSRP Air Outcome and Objective?
  - O Not at all effective
  - O Not very effective
  - O Somewhat effective
  - O Very effective

**NOTE:** Effectiveness is the extent to which the regional plan has achieved or is expected to achieve the outcomes and objectives.

# 17. Do you have any suggestions to improve the effectiveness of the SSRP Air Strategies? (Essay)

The SSRP provides the following indicators for managing air quality:

Air Quality Indicators	Link to Indicator Data
Fine particulate matter	Reports about the Status of Air Quality can be found at
Ground-level ozone	alberta.ca/south-saskatchewan-regional-planning
Nitrogen dioxide	

# 18. Do you have any suggestions to improve the effectiveness of the SSRP Air Indicators? (Essay)

The South Saskatchewan Region Air Quality Management Framework sets regional threshold values, including limits and triggers. Limits are clear boundaries not to be exceeded. Triggers are warning signals that allow for evaluation, adjustment and innovation on an ongoing basis (SSRP pages 184 – 185).

19. Do you have any suggestions to improve the effectiveness of the limits and triggers for managing air quality? (Essay)

### **SECTION 4: Biodiversity and Ecosystems**

Diadiversity and Ecosystems Objectives

The Government of Alberta is committed to using an integrated approach to address changes and impacts to the province's natural biodiversity assets and ecosystems. Conservation of landscapes and connectivity of wildlife habitat across landscapes are key factors in maintaining biodiversity leading to increased healthy and functioning ecosystems.

**Outcome:** Biodiversity and ecosystem function are sustained with shared stewardship. (SSRP pages 56-76)

Biodiversity and Ecosystems Objectives		
Regional	Terrestrial and aquatic biodiversity are maintained.	
	Long-term ecosystem health and resiliency is maintained.	
	Species at risk are recovered and no new species at risk are designated.	
	Intact grasslands habitat is sustained.	
	Biodiversity and healthy, functioning ecosystems continue to provide a range of benefits to communities in the region and all Albertans and there is sustainable use of Alberta's biodiversity resources.	
Crown Lands	The regional network of areas supports biodiversity – conservation is enhanced through additional conservation areas.	
Private Lands	The contributions of landowners for their stewardship and conservation efforts on private lands are recognized.	
	The contribution and value of private lands in supplying ecosystem services is recognized and opportunities to support ecosystem services on private lands are identified.	
	The value of ecosystem services supplied by economic sectors reliant on private lands is recognized.	

- 20. How effective are the Objectives in achieving the SSRP Biodiversity and Ecosystem Function Outcome?
  - O Not at all effective
  - O Not very effective
  - O Somewhat effective
  - O Very effective

**NOTE:** Effectiveness is the extent to which the regional plan has achieved or is expected to achieve the outcomes and objectives.

The SSRP outlines several strategies to support the Biodiversity and Ecosystem Outcome and Objectives (pages 68-76). Below is a summary of those strategies:

### Summary of Biodiversity and Ecosystems Strategies

Integrated Management of Crown Land Complete the South Saskatchewan Region Biodiversity Management Framework...

Implement the Livingstone-Porcupine Hills Land Footprint Management Plan.

Develop landscape management plans to address footprint management for remaining Green Area and White Area public land...

Align forest management planning in the region with the Alberta Forest Strategy...

Review <u>Integrated Resource Plans</u> in the region for their relevance and incorporate as appropriate under the regional plan...

Consolidate and expand Public Land Use Zones for Green Areas on public lands.

Complete the Majorville Guidelines for Land and Resource Management by the end of 2015.

Implement guidelines to avoid conversion and maintain intact native grasslands on public land...

Implement a policy to allow for increased grazing tenure terms, from 10 years to 20 years, to continue to sustain intact native grasslands.

Continue the commitment to stocking rates in effect as of September 1, 2014.

Continue to work with other government agencies, other levels of government, landholders, non-government organizations, industry, the research community, and other partners within and outside the province to manage risk associated with invasive species.

Create new and expanded conservation areas on provincial Crown land...

Manage the Castle area for future generations, protect the headwaters, support the continued practice of traditional land uses...

Manage conserved lands to achieve long-term conservation of biological diversity and ecosystem processes.

Establish a Special Management Area adjacent to the Pekisko Heritage Rangeland linking to the existing Public Land Use Zones...

Explore opportunities for further conservation management approaches using a collaborative approach in areas of grasslands.

Stewardship and Conservation on Private Land Encourage and support the continued stewardship of Alberta's private lands through the development and piloting of regionally appropriate conservation tools...

Complete development and evaluation of the Southeast Alberta Conservation Offset Pilot...

Develop and facilitate the continued voluntary adoption of beneficial management practices that demonstrate agriculture and agri-food sector commitment to environmental stewardship.

Consider connectivity of intact native grasslands as the highest priority under the Land Trust Grant Program.

- 21. How effective are the Strategies in achieving the SSRP Biodiversity and Ecosystem Function Outcome?
  - O Not at all effective
  - O Not very effective
  - O Somewhat effective
  - O Very effective

**NOTE:** Effectiveness is the extent to which the regional plan has achieved or is expected to achieve the outcomes and objectives.

22. Do you have any suggestions to improve the effectiveness of the SSRP Biodiversity and Ecosystem Function Strategies? (Essay)

### **Conservation Areas**

Conservation areas are one of the key approaches that support achieving environmental objectives in the SSRP for biodiversity and ecosystem function, and headwaters protection. The SSRP describes how conservation areas provide opportunities for Albertans to enhance their quality of life through the enjoyment of outdoor recreation and low-impact tourism opportunities, contributing to these social and economic outcomes and objectives.

23.	How effective have conservation areas been in supporting sustainable biodiversity and ecosystem function in the region?
	O Not at all effective
	O Not very effective
	O Somewhat effective
	O Very effective
24.	How effective have conservation areas been in supporting outdoor recreation opportunities in the region?
	O Not at all effective
	O Not very effective
	O Somewhat effective
	O Very effective
25.	How effective have conservation areas been in supporting tourism diversification in the region?
	O Not at all effective
	O Not very effective
	O Somewhat effective
	O Very effective
	NOTE: Effectiveness is the extent to which the regional plan has achieved or is expect

to achieve the outcomes and objectives.

26. How could the effectiveness of conservation areas be improved to meet SSRP Outcomes and Objectives? (Essay)

### SECTION 5: Water

The complex relationship between water, the land and all those that live on it has been recognized and our collective knowledge, understanding and appreciation of this complexity has improved significantly over time.

The province's system for management of water and watersheds continues to be the foundation. Watershed management and headwaters protection are priorities for both water supply and water quality. The Approved Water Management Plan for the South Saskatchewan River Basin continues to provide important guidance for water management in the region.

Outcome: Watersheds are managed to support healthy ecosystems and human needs through shared stewardship. (SSRP pages 77-88)

### Water Objectives

Surface Water Quality	Surface water quality in the Bow, Oldman, South Saskatchewan and Milk Rivers is managed so current and future water uses are protected.
Enhanced Integrated Watershed Management	Regional approaches and tools support integrated management of water and aquatic ecosystems.
Efficient and Resilient Water Supply	Water is used as efficiently as possible to meet the current and future human and ecosystem needs.
	There is resiliency in the ability of the water management system to adapt to change over time.
Headwaters	Headwaters in the region are managed to maintain recharge capabilities and support critical water quality, quantity and aquatic ecosystem requirements.

### 27. How effective are the Objectives in achieving the SSRP Water Outcome?

- O Not at all effective
- O Not very effective
- O Somewhat effective
- O Very effective

**NOTE:** Effectiveness is the extent to which the regional plan has achieved or is expected to achieve the outcomes and objectives.

### 28. How could the effectiveness of the SSRP Water Objectives be improved? (Essay)

The SSRP outlines several strategies to support the Water Outcome and Objectives (pages 82 – 88). Below is a summary of those strategies:

### **Summary of Water Strategies**

Surface Water Quality	Implement the South Saskatchewan Region Surface Water Quality Management Framework
Enhanced Integrated Watershed Management	Develop a comprehensive approach for groundwater management  Continue to support the work of the Watershed Planning and Advisory Councils on watershed assessment and planning under the Water for Life Strategy, in alignment with regional planning
	Continue to increase knowledge and improve management of wetland areas within the region.
	Continue to increase knowledge and improve management of riparian lands within the region.
	Encourage the use of best management practices for land disturbances to minimize sedimentation of water bodies
	Encourage the development of source water protection plans and the use of source water protection measures
	Continue to require the development of drinking water safety plans for all municipal waterwork systems as required under the current regulatory system Encourage decision-makers and land managers to use the available planning information, including: riparian and wetland mapping and inventories,
-	environmentally significant areas mapping and groundwater vulnerability mapping.
Efficient and Resilient Water Supply	Continue to develop an optimized water management system in the region.  Continue to work towards the targets set within the Water for Life strategy with all sectors demonstrating best management practices to reach overall water efficiency and productivity improvements by 30 percent  Continue to develop approaches to address the climate variability found in the region.
Headwaters	Protect key headwaters through the establishment of conservation areas.  Continue collaboration with the Watershed Planning and Advisory Councils on headwaters management initiatives such as development of headwaters integrity indicators.  Review existing water conservation objectives for headwaters tributaries in support
	of the Approved Water Management Plan for the South Saskatchewan River Basin.

Reports about the Management Reponses to the Surface Water Quality Management Framework can be found at alberta.ca/south-saskatchewan-regional-planning.

- 29. How effective are the Strategies in achieving the SSRP Water Objectives?
  - O Not at all effective
  - O Not very effective
  - O Somewhat effective
  - O Very effective

**NOTE:** Effectiveness is the extent to which the regional plan has achieved or is expected to achieve the outcomes and objectives.

# 30. Do you have any suggestions to improve the effectiveness of the SSRP Water Strategies? (Essay)

The SSRP provides the following indicators for surface water quality on key rivers at key locations in the region through the South Saskatchewan Water Quality Management Framework (SSRP pages 186 – 194) and water quantity (Table 1, SSRP page 116). The indicators are:

Water Indicators		Link to Indicator Data
Surface Water	Total Ammonia (NH <sub>3+4</sub> -N)	Reports about the Status of Surface Water
Quality	Chloride (Cl <sup>-</sup> )	Quality can be found at <u>alberta.ca/south-</u> saskatchewan-regional-planning
	Nitrate (NO <sub>3</sub> -N)	saskatoriewai i regional pianning
	Total Nitrogen (TN)	
	Total Dissolved Phosphorus (TDP)	
	Sulphate (SO <sub>4</sub> -)	
Specific Cond	Sodium Adsorption Ratio (SAR)	
	Specific Conductivity	
	Total Dissolved Solids	
	Total Organic Carbon	
	Total Suspended Solids	
	Turbidity	
	рН	
	Escherichia coli	
Water Quantity	Water Quantity	Links to Water Quantity monitoring can be found at alberta.ca/environmental-monitoring#water

# 31. Do you have any suggestions to improve the effectiveness of the SSRP Water Indicators? (Essay)

The South Saskatchewan Region Surface Water Quality Management Framework sets regional threshold values, including limits and triggers on key rivers at key locations in the region. Limits are clear boundaries not to be exceeded. Triggers are warning signals that allow for evaluation, adjustment and innovation on an ongoing basis (SSRP pages 186 – 194).

# 32. Do you have any suggestions to improve the effectiveness of the SSRP Water Quality Triggers and Limits? (Essay)

### **SECTION 6: Efficient Use of Land**

Recognizing that Alberta will continue to grow and develop over time, the Land-use Framework promotes approaches to reduce the amount of land that is taken up by permanent or long-term developments associated with the built environment. To improve knowledge and understanding of the approaches and best practices that have been used in Alberta and other jurisdictions, the Government of Alberta has created the Integrated Land Management Tools Compendium.

Outcome: Lands are efficiently used to minimize the amount of area taken up by the built environment. (SSRP pages 89-90)

### Efficient Use of Land Objective

The amount of land that is required for development of the built environment is minimized over time.

# 33. How could the effectiveness of the SSRP Efficient Use of Land Objective be improved? (Essay)

The SSRP outlines several strategies to support the Efficient Use of Land Outcome and Objective (pages 89 – 90). Below is a summary of those strategies:

### Summary of Efficient Use of Land Strategies

All land-use planners and decision-makers responsible for land-use decisions are encouraged to consider the efficient use of land principles in land-use planning and decision-making.

### **Principles**

- Reduce the rate at which land is converted from an undeveloped state into permanent, built environment.
- 2. Utilize the minimum amount of land necessary for new development and build at a higher density than current practice.
- 3. Increase the proportion of new development that takes place within already developed or disturbed lands either through infill, redevelopment and/or shared use, relative to new development that takes place on previously undeveloped lands.
- 4. Plan, design and locate new development in a manner that best utilizes existing infrastructure and minimizes the need for new or expanded infrastructure.
- Reclaim and/or convert previously developed lands that are no longer required in a progressive and timely manner.
- 6. Provide decision-makers, land users and individuals the information they need to make decisions and choices that support efficient land use.

Build awareness and understanding of the efficient use of land principles and the application of land-use planning tools that reduce the footprint of the built environment, how they might be applied and how their effectiveness would be measured over time with municipalities, land-use decision-makers and land users, on both public and private lands.

34.	How effective are the Strategies in achieving the SSRP	Efficient Use o	f Land
	Outcome and Objective?		

- O Not at all effective
- O Not very effective
- O Somewhat effective
- O Very effective

**NOTE:** Effectiveness is the extent to which the regional plan has achieved or is expected to achieve the outcomes and objectives.

# 35. Do you have any suggestions to improve the effectiveness of the SSRP Efficient Use of Land Strategies? (Essay)

### SECTION 7: Outdoor Recreation and Historic Resources

Outdoor recreation areas are important for residents and visitors and provide areas for people to visit, play and enjoy the natural beauty of Alberta. These areas are intended to provide quality recreational experiences, attract tourism investment and provide security of land tenure for private and not-for-profit investment.

Historic resources will be managed to minimize the impacts of development on their integrity. Promoting the preservation of historic places and structures will ensure that tangible examples of the past continue to be accessible.

Outcome: The quality of life of residents is enhanced through increased opportunities for outdoor recreation and the preservation and promotion of the region's unique cultural and natural heritage. (SSRP pages 91 - 101)

### **Outdoor Recreation and Historic Resources Objectives**

A wide range of recreation experiences and tourism opportunities that meet the preferences of regional residents and visitors will be provided.

The artifacts, fossils, historic places and aboriginal heritage sites that define the region's distinctive character are identified and effectively managed.

# 36. How could the effectiveness of the SSRP Outdoor Recreation and Historic Resource Objectives be improved? (Essay)

**NOTE:** Effectiveness is the extent to which the regional plan has achieved or is expected to achieve the outcomes and objectives.

The SSRP outlines several strategies to support the Outdoor Recreation and Historic Resources Outcomes and Objectives (pages 96–100). Below is a summary of those strategies:

### Summary of Outdoor Recreation and Historic Resource Strategies

In collaboration with communities, industry, stakeholders and aboriginal peoples develop the South Saskatchewan Regional Trail System Plan to provide designated land and water trails for year-round recreation linking communities, parks and outdoor spaces.

Explore legislative tool options to help address liability concerns and facilitate continued work with trail groups and stewards in planning, developing and managing trails.

Address flood (2013) damaged recreation and parks areas including infrastructure such as campground facilities, staging areas and trails.

Support current and future projects to identify, maintain and enhance sustainable long-term public access to recreational water bodies.

Deliver education, awareness and compliance programs to promote and support responsible land use and shared stewardship.

Implement the Livingstone-Porcupine Hills Recreation Management Plan.

Develop comprehensive and integrated recreation management plans for remaining lands in the Green Area working with communities, industry, other stakeholders and aboriginal peoples...

Create new public land recreation areas in the eastern slopes to provide defined "no service" camping areas and improve access to trails...

In concert with developers, ensure that land-based development activities are assessed to identify and protect historic resources.

Ensure continued public accessibility to information regarding historic resources in the region.

### Summary of Outdoor Recreation and Historic Resource Strategies

Identify and designate important historic resources in the region with municipal partners.

Work with and support Parks Canada to nominate Writing-on-Stone Provincial Park for inscription on the UNESCO World Heritage List.

Invest in existing parks facilities and expand and designate new provincial parks and provincial recreation areas to enhance the experiences of users across the region and provide recreational opportunities, contribute to tourism growth and address growing recreational demand in the region.

Ensure all regional sites within the provincial parks system are appropriately classed and consolidated...

Manage Recreation and Parks Areas to ensure quality outdoor recreation and nature-based tourism experiences while minimizing environmental impacts.

Develop the regional parks plan for the South Saskatchewan Region to direct the planning and management of new and existing parks within the provincial parks system...

- 37. How effective are the Strategies in achieving the SSRP Outdoor Recreation and Historic Resources Objectives?
  - O Not at all effective
  - O Not very effective
  - O Somewhat effective
  - O Very effective
- **NOTE:** Effectiveness is the extent to which the regional plan has achieved or is expected to achieve the outcomes and objectives.
- 38. Do you have any suggestions to improve the effectiveness of the SSRP Outdoor Recreation and Historic Resource Strategies? (Essay)

### SECTION 8: Inclusion of Aboriginal Peoples<sup>3</sup> in Land-use Planning

Aboriginal culture, with its connection to the land and environment, provides a unique opportunity to inform land-use planning and land management initiatives. The Government of Alberta continues to look for opportunities to engage aboriginal peoples and to identify ways of working together.

Outcome: Aboriginal peoples are included in land-use planning. (SSRP pages 101 – 104)

### Objective for the Inclusion of Aboriginal Peoples in Land-use Planning

To encourage aboriginal peoples' participation in land-use planning and input to decision-making in recognition of the cultural and economic importance of land use to those aboriginal communities with constitutionally protected rights. This will provide both aboriginal communities and the Government of Alberta with a basis for better addressing current and potential land-use conflicts, in a manner supportive of aboriginal traditional uses, such as the exercise of Treaty rights.

- 39. How could the effectiveness of the SSRP Objective for the Inclusion of Aboriginal Peoples in Land-use Planning be improved? (Essay)
  - **NOTE:** Effectiveness is the extent to which the regional plan has achieved or is expected to achieve the outcomes and objectives.

<sup>&</sup>lt;sup>3</sup> For the purpose of this Survey, the term "aboriginal" is used when referring directly to the SSRP 2018 or to section 35 of the *Constitution Act*, 1982. In more recent years, the term "Indigenous" has been more frequently used.

The SSRP outlines several strategies to support the Outcome and Objective for the inclusion of aboriginal peoples in land-use planning (pages 102-104). Below is a summary of those strategies:

### Summary of Strategies for the Inclusion of Aboriginal Peoples in Land-use Planning

In accordance with applicable government policy as it may be from time to time, the Government of Alberta will continue to consult with aboriginal peoples in a meaningful way when government decisions may adversely affect the continued exercise of their constitutionally protected rights and the input from such consultations continues to be considered prior to the decision.

Explore and present potential new approaches to draw on the rich cultural, ecological and traditional land-use knowledge and stewardship practices of aboriginal communities.

Establish a South Saskatchewan Region Land Sub-Table with First Nations with an interest in the region...

Continue First Nation involvement in watershed management planning initiatives...

Engage aboriginal peoples on initiatives to support tourism development...

Promoting the economic, social and cultural well-being of aboriginal communities.

Encourage and facilitate information sharing and education opportunities between First Nations with an interest in the region and the Government of Alberta.

- 40. How effective are the Strategies in achieving the SSRP Inclusion of Aboriginal Peoples in Land-use Planning Objective?
  - O Not at all effective
  - O Not very effective
  - O Somewhat effective
  - O Very effective

**NOTE:** Effectiveness is the extent to which the regional plan has achieved or is expected to achieve the outcomes and objectives.

41. Do you have any suggestions to improve the effectiveness of the SSRP Inclusion of Aboriginal Peoples in Land-use Planning Strategies? (Essay)

### **SECTION 9: Community Development**

The South Saskatchewan Regional Plan incorporates updated broad land-use policy statements that replace the land-use policies established under the Municipal Government Act (Order in Council 522-96). The province retains the authority to provide guidelines to municipalities on expectations needed to promote cooperation and coordination in land-use planning to reflect the uniqueness of the region.

The Government of Alberta is committed to continuing to encourage and promote this collaborative approach in the South Saskatchewan Region. One of the models is the Calgary Regional Partnership<sup>4</sup>, a voluntary partnership consisting of municipalities in the Calgary region working together to address issues of a regional nature in the Calgary Metropolitan Plan.

Outcome: Community development needs are anticipated and accommodated. (SSRP pages 105 - 113)

### **Community Development Objectives**

Planning Cooperation and Integration

Cooperation and coordination are fostered among all land-use planners and decision-makers involved in preparing and implementing land plans and strategies.

Knowledge sharing among communities is encouraged to promote the use of planning tools and the principles of efficient use of land to address community development in the region.

Calgary Regional Partnership

Work together to ensure growth occurs in a sustainable manner in the region.

Building Sustainable Communities Ensure provincial guidance is provided to municipalities and other stakeholders to:

- Promote healthy and sustainable communities;
- Foster the establishment of land-use patterns for an orderly, economical and beneficial development, as well as to maintain and improve the quality of the built environment:
- Support timely planning and provision of social infrastructure;
- Contribute to the "maintenance and enhancement" of a healthy natural environment:
- Foster preservation of historic resources through responsible land-use management:
- Contribute to a safe, efficient and cost-effective transportation network;
- · Minimize risk to health, safety and loss to property damage as a result of landuse decisions.

### 42. How could the effectiveness of the SSRP Community Development Objectives be improved? (Essay)

NOTE: Effectiveness is the extent to which the regional plan has achieved or is expected to achieve the outcomes and objectives.

Note: The Calgary Regional Partnership is now the Calgary Metropolitan Growth Board.

SSRP identifies several strategies to support the Community Development Outcome (SSRP pages 107-113). Below is a summary of those strategies:

### **Summary of Community Development Strategies**

Planning Cooperation and Integration

# Calgary Regional Partnership<sup>5</sup>

# Municipalities, provincial departments, boards and agencies and other partners are expected to:

Work together to achieve the shared environmental, economic and social outcomes in the South Saskatchewan Regional Plan and minimize negative environmental cumulative effects...

Address common planning issues, especially where valued natural features and historic resources are of interests to more than one stakeholder and where the possible effect of development transcends jurisdictional boundaries...

Coordinate and work with each other in their respective planning activities (such as in the development of plans and policies) and development approval processes to address issues of mutual interest...

Work together to anticipate, plan and set aside adequate land with the physical infrastructure and services required to accommodate future population growth and accompanying community development needs...

Build awareness regarding the application of land-use planning tools that reduce the impact of residential, commercial and industrial developments on the land, including approaches and best practices for promoting the efficient use of private and public lands...

Pursue joint use agreements, regional service commissions and any other joint cooperative arrangements that contribute specifically to intermunicipal land-use planning...

Consider the value of intermunicipal development planning to address land use on fringe areas, airport vicinity protection plans or other areas of mutual interest...

Coordinate land-use planning activities with First Nations, irrigation districts, school boards, health authorities and other agencies on areas of mutual interest...

### Government of Alberta

Build awareness and work with municipalities to implement strategies that support achieving the regional outcome that community development needs are anticipated and accommodated...

### Calgary Regional Partnership

The Government of Alberta recognizes the significance and importance of the Calgary Regional Partnership, and the Calgary Metropolitan Plan, in contributing to the objectives of the South Saskatchewan Regional Plan...

### Building Sustainable Communities

### Land-Use Patterns - Municipalities

Provide an appropriate mix of agricultural, residential, commercial, industrial, institutional, public and recreational land uses; developed in an orderly, efficient, compatible, safe and economical manner.

Contribute to a healthy environment, a healthy economy and a high quality of life.

Provide a wide range of economic development opportunities, stimulate local employment growth and promote a healthy and stable economy. Municipalities are also expected to complement regional and provincial economic development initiatives.

Feature innovative housing designs, range of densities and housing types such as mixed-use, cluster developments, secondary suites, seniors' centres and affordable housing...

Minimize potential conflict of land uses adjacent to natural resource extraction, manufacturing and other industrial developments.

27

<sup>&</sup>lt;sup>5</sup> Note: The Calgary Regional Partnership is now the Calgary Metropolitan Growth Board.

### **Summary of Community Development Strategies**

Minimize potential conflict of land uses within and adjacent to areas prone to flooding, erosion, subsidence, or wildfire.

Complement their municipal financial management strategies, whereby land use decisions contribute to the financial sustainability of the municipality.

Locate school and health facilities, transportation, transit and other amenities appropriately, to meet increased demand from a growing population.

### Agriculture - Municipalities

Identify areas where agricultural activities, including extensive and intensive agricultural and associated activities, should be the primary land use in the region.

Limit the fragmentation of agricultural lands and their premature conversion to other, non-agricultural uses, especially within areas where agriculture has been identified as a primary land use in the region. Municipal planning, policies and tools that promote the efficient use of land should be used where appropriate to support this strategy.

Employ appropriate planning tools to direct non-agricultural subdivision and development to areas where such development will not constrain agricultural activities, or to areas of lower-quality agricultural lands.

Minimize conflicts between intensive agricultural operations and incompatible land uses by using appropriate planning tools, setback distances and other mitigating measures.

### Water and Watersheds - Municipalities

Utilize or incorporate measures which minimize or mitigate possible negative impacts on important water resources or risks to health, public safety and loss to property damage due to hazards associated with water, such as flooding, erosion and subsidence due to bank stability issues, etc., within the scope of their jurisdiction.

Incorporate measures in future land-use planning decisions to mitigate the impact of floods through appropriate flood hazard area management and emergency response planning for floods.

Prohibit unauthorized future use or development of land in the floodway in accordance with the *Flood Recovery and Reconstruction Act* and the Floodway Development Regulation under development, which will control, regulate or prohibit use or development of land that is located in a floodway and define authorized use...

Identify and consider, based on available information including information from the Government of Alberta, the values of significant water resources and other water features, such as ravines, valleys, riparian lands, stream corridors, lakeshores, wetlands and unique environmentally significant landscapes, within their boundaries.

Determine appropriate land-use patterns in the vicinity of these significant water resources and other water features.

Consider local impacts as well as impacts on the entire watershed.

Consider a range of approaches to facilitate the conservation, protection or restoration of these water features and the protection of sensitive aquatic habitat and other aquatic resources.

Establish appropriate setbacks from waterbodies to maintain water quality, flood water conveyance and storage, bank stability and habitat.

Assess existing developments located within flood hazard areas for long-term opportunities for redevelopment to reduce risk associated with flooding, including human safety, property damage, infrastructure and economic loss.

### Summary of Community Development Strategies

Facilitate public access and enjoyment of water features, to the extent possible.

Use available guidance, where appropriate, from water and watershed planning initiatives in support of municipal planning.

### Non-renewable Resources - Municipalities

Collaborate with industry, the provincial government and other stakeholders to identify areas of existing and future extraction of energy resources, surface materials, such as sand and gravel, and determine appropriate land uses in the vicinity of these resources.

Utilize or incorporate measures, which minimize or mitigate possible negative impacts, and minimize risks to health, safety and property.

# Historic Resources - Municipalities in consultation with the Minister responsible for the *Historical Resources Act*

Identify significant historic resources to foster their preservation and enhancement for use and enjoyment by present and future generations.

Work toward the designation of Municipal Historic Resources to preserve municipally significant historic places.

Formulate agreements with the Ministry for development referrals to assist in the identification and protection of historic resources within the scope of their jurisdiction.

# Transportation - Municipalities in consultation with the Minister responsible for the *Highways Development and Protection Act*

Identify the location, nature and purpose of key provincial transportation corridors and related facilities.

Work with the Ministry to minimize negative interactions between the transportation corridors and related facilities identified in accordance with the above strategy and the surrounding areas and land uses through the establishment of compatible land-use patterns.

Enter into highway vicinity agreements with the Ministry and employ appropriate setback distances and other mitigating measures relating to noise, air pollution and safety to limit access if subdivision and development is to be approved in the vicinity of the areas identified in accordance with the above strategies.

43.	How effective are the Strategies in achieving the SSRP Community Development
	Outcome and Objectives?

- O Not at all effective
- O Not very effective
- O Somewhat effective
- O Very effective

**NOTE:** Effectiveness is the extent to which the regional plan has achieved or is expected to achieve the outcomes and objectives.

44. Do you have any suggestions to improve the effectiveness of the SSRP Community Development Strategies? (Essay)

### **Section 10: Regional Indicators of Interest**

Table 1 of the SSRP (page 116) identifies the indicators of interest that are representative of the broad economic, environmental and social outcomes desired for the region:

### Provincial Outcome: Healthy economy supported by our land and natural resources

Regional Outcome: The region's economy is growing and diversified		
Economic Indicators		Link to Indicator Data
General Economy	Gross domestic product	Indicator data for the South
	Business establishments	Saskatchewan Region can be found at lufereporting-esrd.hub.arcgis.com/
	Inventory of major projects	pages/south-saskatchewan
	Building permits	
	Employment	
	Average total income	
Agriculture	Agricultural land fragmentation	Indicator data for the South
	Agricultural land conversion	Saskatchewan Region can be found at lufereporting-esrd.hub.arcgis.com/pages/south-saskatchewan
		For more detailed information on Agriculture indicators, including their values and trends, see alberta.ca/agriculture-reporting-south-saskatchewan-regional-plan

### Provincial Outcome: Healthy ecosystems and environment

Regional Outcome:	Indicator	Link to Indicator Data
Air quality is managed to support healthy ecosystems environment and human needs through shared stewardship.	Air Quality	Reports about the Status of Air Quality can be found at <u>alberta.ca/south-</u> saskatchewan-regional-planning
Biodiversity and ecosystem function are sustained through shared stewardship.	Biodiversity indicators (not yet developed as part of biodiversity management framework)	
	Area of conserved land	
Watersheds are managed to support healthy environment ecosystems and human needs through shared	Water quality	Reports about the Status of Surface Water Quality can be found at alberta.ca/south-saskatchewan-regional-planning
stewardship.	Water quantity	Links to Water Quantity monitoring can be found at alberta.ca/environmental- monitoring#water
Land is used efficiently to reduce the amount of area that is taken up by permanent or long-term developments associated with the built environment.	Indicators in development	

### Provincial Outcome: People-friendly communities with ample recreational and cultural opportunities

Regional Outcome:	Indicator	Link to Indicator Data
The quality of life of residents is enhanced through increased opportunities for outdoor recreation and the preservation and promotion of the region's unique cultural and natural heritage.	Parks per capita Recreation infrastructure Historic resources	Indicator data for the South Saskatchewan Region can be found at lufereporting-esrd.hub.arcgis.com/ pages/south-saskatchewan
Aboriginal peoples are included in land-use planning.	Aboriginal peoples continue to be consulted when Government Alberta decisions may adversely affect their continued exercise of their constitutionally protected mineral resources rights and the input from such consultation continues to be reviewed prior to the decision.	
Community development needs are anticipated and accommodated.	Population	Indicator data for the South Saskatchewan Region can be found at lufereporting-esrd.hub.arcgis.com/ pages/south-saskatchewan

# 45. Do you have any suggestions to improve the effectiveness of the SSRP Regional Indicators? (Essay)

**NOTE:** Effectiveness is the extent to which the regional plan has achieved or is expected to achieve the outcomes and objectives.

### **SSRP Indicators**

The SSRP identifies a number of indicators for the SSRP outcomes and objectives:

- Indicators for Economic Growth and Diversification (SSRP, page 52)
- Indicators for Managing Air Quality (SSRP, page 55)
- Indicators for Managing Biodiversity and Ecosystems (SSRP, page 76)
- Indicators for Managing Water Quality (SSRP, page 82)
- Indicators for Managing Water Supply (SSRP, page 88)
- Indicators for Efficient use of Land (SSRP, page 90)
- Indicators for Outdoor Recreation and Historic Resources (SSRP, page 101)
- Indicators for Inclusion of Aboriginal Peoples in Land-use Planning (SSRP, page 104)
- Indicator for Community Development (SSRP, page 113)

Links to the indicator data may be found at:

- lufereporting-esrd.hub.arcgis.com/pages/south-saskatchewan
- alberta.ca/south-saskatchewan-regional-planning
- alberta.ca/agriculture-reporting-south-saskatchewan-regional-plan
- alberta.ca/environmental-monitoring
- 46. Please provide your feedback on the effectiveness of the SSRP's Indicators, or ways you think their effectiveness can be improved. (Essay)

### SECTION 11: Overall Feedback on the South Saskatchewan Regional Plan

- 47. Would you like to provide any additional feedback on the overall relevancy and effectiveness of the SSRP? (Essay)
- 48. Do you have any suggestions on how to further streamline and remove barriers in the land use planning process under the *Alberta Land Stewardship Act*? (Essay)

### **SECTION 12: Tell Us About Yourself**

- 49. Where do you live?\*
  - O In Alberta, in the South Saskatchewan Region
  - O In Alberta, outside the South Saskatchewan Region
  - O In Canada, outside of Alberta
  - O Outside of Canada
  - O Prefer not to answer
- 50. Over the past 12 months, how often have you participated in recreation or tourism experiences within the South Saskatchewan Region?\*
  - O Haven't visited in the past 12 months
  - O A few times
  - O Once a month
  - O Once a week
  - O More than once a week

<sup>\*</sup> All fields marked with an asterisk (\*) are required.

- 51. Are you providing feedback on behalf of an organization, community or interest group?\*
  - a. Yes
    - i. What is the name of the community or organization you are providing input on behalf of? (single line)
    - ii. What sector best describes your organization? (radio)
      - 1. Agriculture sector
      - 2. Forestry sector
      - 3. Indigenous group or community
      - 4. Non-governmental organization
      - 5. Oil and gas sector
      - 6. Public sector
      - 7. Tourism sector
      - 8. Other (please specify):\_\_\_\_\_
  - b. No
    - i. Do you currently work in the South Saskatchewan Region? (radio)
      - 1. Yes
        - a. Are you a member of, employed by, or associated with any of the following sectors or groups? (radio)
          - i. Agriculture sector
          - ii. Forestry sector
          - iii. Indigenous group or community
          - iv. Non-governmental organization
          - v. Oil and gas sector
          - vi. Public sector
          - vii. Tourism sector
        - viii. Other (please specify):\_\_\_\_\_
      - 2. No
      - 3. Prefer not to answer
- 52. How was your experience sharing your input today? (radio)
  - a. Pooi
    - i. What made your experience poor? (255-character limit)
  - b. Acceptable
  - c. Good
    - i. What made your experience good? (255-character limit)

Alberta
